# Team Member 1

## Team Member 2

The screenshot shows a Jupyter Notebook interface in a web browser. The browser's address bar displays `localhost:8889/notebooks/Untitled1.ipynb?kernel_name=python3`. The Jupyter interface includes a menu bar with 'File', 'Edit', 'View', 'Insert', 'Cell', 'Kernel', 'Widgets', and 'Help'. Below the menu is a toolbar with icons for file operations, running, and code execution. The notebook itself is titled 'Untitled1' and shows a 'Last Checkpoint: 5 minutes ago (autosaved)' status. The code area contains three input cells: the first with `import pandas as pn`, the second with `pn.__version__` which has an output of `'1.4.4'`, and a third empty cell. The bottom of the image shows a Windows taskbar with the search bar and several application icons.

## Team Member 3

This screenshot is identical to the one for Team Member 2, showing the same Jupyter Notebook interface with the same code cells and browser environment.
